Re: *Revision of the Commission's Program Access Rules, et al.*, MB Docket Nos. 12-68,
07-18, 05-192

Dear Ms. Dortch:

On September 24, 2012, on behalf of Google Fiber, Inc. ("Google Fiber"), I participated in a telephone conversation with Elizabeth Andrion, Acting Chief of the Office of Strategic Planning & Policy Analysis.

I provided an update on the deployment of Google Fiber in Kansas City, Kansas and Kansas City, Missouri. I discussed the success of Google Fiber's pre-registration process, including how 180 out of 202 Fiberhoods had met pre-registration goals and would receive Google Fiber. I also noted that Google Fiber has plans going forward to partner with local community organizations to provide digital literacy grants and training to historically underserved areas of the Kansas City community.

I indicated that customer sign-ups in the first Fiberhoods have begun and described the various Google Fiber product offerings available to consumers. I noted that Google Fiber continues to add channels to its Google Fiber TV offering. I discussed the importance of being able to provide customers with access to must-have live regional sports programming and the difficulty of obtaining this programming. I also inquired about the continuing ability of competitors and new entrants to access essential regional sports programming as the Commission considers action in the above-captioned proceeding.

Please do not hesitate to contact me with any questions.

Regards,

/s/ Megan Anne Stull
